We are extremely grateful to Barry Johnson for facilitating our use of the micro estate tax returns data and for his enormous help and patience explaining it. We thank Ed Wolff for providing us with additional and unpublished data from Wolff (1989). We thank two anonymous referees, Tony Atkinson, Alan Auerbach, David Joulfaian, Arthur Kennickell, Thomas Piketty, Karl Scholz, James Poterba, Joel Slemrod, Scott Weisbenner, and numerous seminar participants for very helpful comments and discussions. Jeff Leibman and Jeff Brown kindly shared their socioeconomic mortality differential measures. Financial support from NSF Grant SES-0134946 and from the Social Sciences and Humanities Research Council of Canada is gratefully acknowledged. The views expressed herein are those of the author(s) and not necessarily those of the National Bureau of Economic Research.
