(check on-line for updated versions)
- Previous year syllabus :
<http://piketty.pse.ens.fr/teaching/10/65>

- The objective of this course is to present recent research in the area of income and wealth distribution. Issues will include the following.
- How did income and wealth distributions evolve since the 19th century, how can we account for these changes? What was the interaction with the growth and capital accumulation process?
- Did the recent rise of inequality contribute to the 2008 financial crisis? What will be the impact of the crisis on income and wealth distributions?
- **Can we properly understand macro issues with representative-agent models?**

- This course will take for the most part a positive perspective on distributional issues. For references on normative models of optimal redistribution and taxation, see my [Public Economics course](#)
- The course is organized in 8 lectures of 3 hours (7 lectures + 1 exam)
- To validate the course, students are required :
 - (1) to attend and actively participate to all lectures;
 - (2) to take the exam(past exams are available [here](#))

A quick roadmap of the lectures

- **Lecture 1: Income, capital and growth**
(Tuesday November 26th 2013, 13h30-16h30)
- **Lecture 2: The dynamics of capital/income ratios: private vs public capital**
(Tuesday December 3rd 2013, 13h30-16h30)
- **Lecture 3: The dynamics of capital/income ratios: $\beta=s/g$**
(Tuesday December 10th 2013, 13h30-16h30)

- **Lecture 4: From capital/income ratios to capital shares**
(Tuesday December 17th 2013, 13h30-16h30)
- **Lecture 5: The structure of inequality: labor income**
(Tuesday January 7th 2014, 13h30-16h30)
- **Lecture 6: The structure of inequality: capital ownership**
(Tuesday January 14th 2014, 13h30-16h30)
- **Lecture 7: The regulation of capital and inequality**
(Tuesday January 21st 2014, 13h30-16h30)
- **Lecture 8: Exam**
(Tuesday January 28th 2014, 13h30-16h30)
