"Public Economics" is an optional second-year master course that is highly recommended for students wishing to specialize in public economics and related subjects. The objective is to present an introduction to public economics, with special emphasis on optimal taxation and public spendings, and the incidence of tax and transfers policies, both in developed countries and in the developing world.

"Public Economics" is jointly taught by Antoine Bozio, Julien Grenet and Thomas Piketty. The present syllabus describes the material and reading list used for the three lectures given by T. Piketty. These three lectures focus upon normative theories of social and fiscal justice, the historical evolution of wealth and property taxes across countries, and theoretical models of optimal taxation and accumulation of capital and wealth.
Although this is not a formal prerequisite, I assume that students have already taken the "Introduction to Economic History" course and are familiar with the basic facts regarding the historical evolution of income and wealth, the changing composition of capital ownership, etc. Students who have not taken this course (or need to refresh their memory) are strongly encouraged to go through the syllabus and slides used in this course.
A quick roadmap of the lectures

- The course is organized in 12 lectures of 3 hours
- To validate the course, students are required
  (1) to attend and actively participate to all lectures;
  (2) to take the exam (past exams are available [here](#))

- Lectures 1-7 by A. Bozio and J. Grenet
  (General introduction; Tools for welfare analysis; Taxation of goods and services; Labor income taxation; Social insurance)

- **Lecture 8: Normative theories of fiscal and social justice** (T. Piketty) (Monday November 6\(^{th}\) 2017)
• **Lecture 9: Wealth & property taxes over time & across countries** (T. Piketty)
  (Monday November 13th 2017)

• **Lecture 10: Optimal taxation & accumulation of capital & wealth** (T. Piketty)
  (Tuesday November 21st 2017)

• Lectures 11-12 by A. Bozio & J. Grenet
  (Corporation taxation; externalities)
How to use the reading list

• The lecture slides and reading list contains many references (particularly regarding the history of taxation, theories of justice, and optimal taxation). Aim is to provide an introduction to the existing literature for students who plan to specialize in these areas. You are not expected to read everything!

• You should read at least the “compulsory readings” (denoted with a *), as well as a selection of books and articles based on your own tastes. But please read!

• The exam will be based upon a good working knowledge of all the material that is presented in the lecture slides and the compulsory readings. Please ask during the classes if there is anything unclear in this material.
