Download the latest version from www.blueprintcss.org and add these lines into the <head> of your page. Check that your href path is correct.

```html
<link rel="stylesheet" href="blueprint/screen.css" type="text/css"
media="screen, projection" />
<link rel="stylesheet" href="blueprint/ie.css" type="text/css"
media="screen, projection" />
</head>
```

**GRID**

Defined in grid.css. Each column is 30px wide with a 10px right margin (except the last column which has no margin). If you need more or fewer columns use this formula to find the new total width:

\[
\text{total width} = (\text{columns} \times 40\text{px}) - 10\text{px}.
\]

(See page 2 for full grid diagram.)

**GRID CLASSES**

- `.append-x` Add these to a column to add empty columns to the right; x = 1 to 23.
- `.prepend-x` Add these to a column to add empty columns to the left; x = 1 to 23.
- `.pull-x` Use these classes on an element to pull it left into the previous column; x = 1 to 23.
- `.push-x` Use these classes on an element to push it right into the next column; x = 1 to 23.
- `.last` The last column in a row needs this class.
- `.even` Table-stripping for older browsers that don’t support ‘tbody tr:nth-child(even) td’.

**TYPOGRAPHY**

- `typography.css` sets up some sensible default typography. The font-size percentage is of 16px (0.75 x 16px = 12px). Line-heights and vertical margins are automatically calculated from this in ems.

  The base line-height is 18px (1.5em). This means that each element, from line-heights to images that has a height that is a multiple of 18 (or 1.5 if you use ems). (See page 2 for a table of values.)

  - `h1-h6` color is #111 (nearly black); body color is #222 (dark grey); font-family is “Helvetica Neue”, “Helvetica”, “Arial”, sans-serif.

**PURSHPULL CLASSES**

Use these classes on an element to push it right into the next column, or pull it left into the previous column.

- `.push-1` to `.push-24`
- `.pull-1` to `.pull-24`

**APPEND CLASSES**

Add these to a column to add empty columns to the right.

- `.append-1` to `.append-24`

**PREPEND CLASSES**

Add these to a column to add empty columns to the left.

- `.prepend-1` to `.prepend-24`

**SPAN CLASSES**

Use these classes to set the width of a column.

- `.span-1` to `.span-24`

**CONTACT**

Cheat sheet v.4.2 by Gareth J M Saunders (www.garethjmsaunders.co.uk/blueprint)

Blueprint CSS version 1.0 (www.blueprintcss.org)

Total width = (columns x 40px) - 10px. (See page two for full grid diagram.)
**LINE-HEIGHT**

The base line-height is 18px. Every element from images to line-height is a multiple of 18.
