

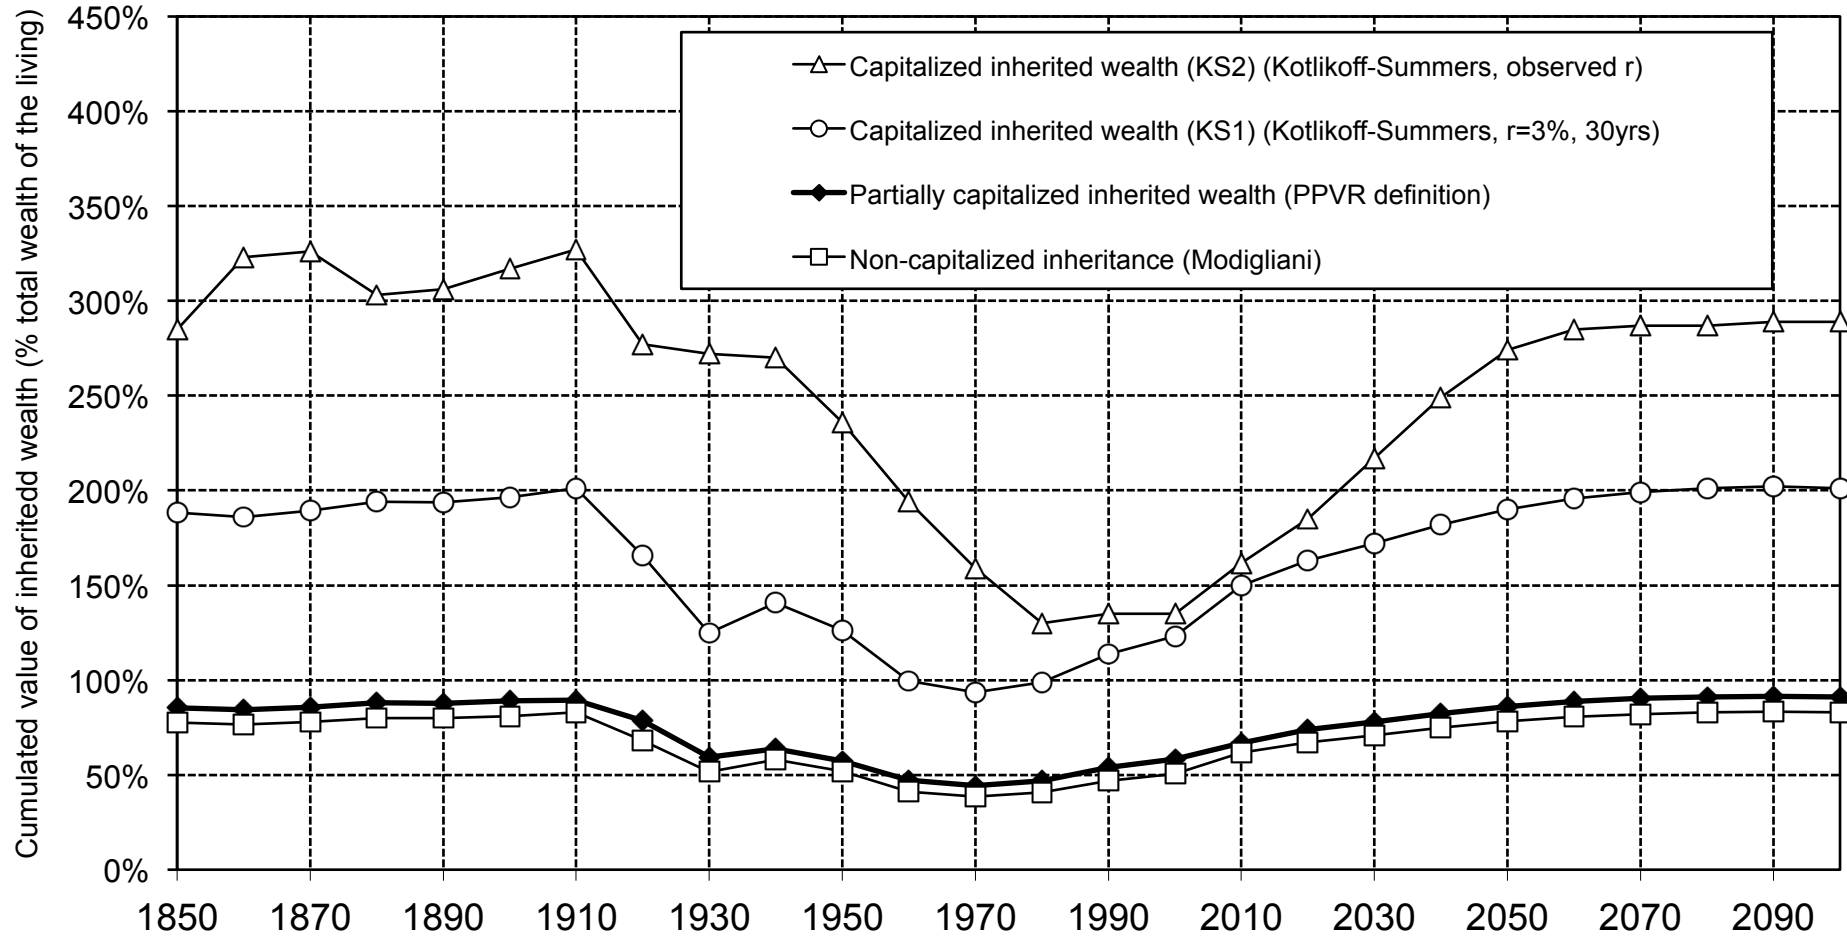

Figure S11.6. Share of inherited wealth in total wealth, France 1850-2100
 (2010-2100: $g=1,0\%$, $r=5,0\%$)

Taking into account capitalized inherited wealth increases the inheritance share; PPVR definition (capitalized income in the limit of the current wealth) limits this effect. Sources and series: see piketty.pse.ens.fr/capital21c
