

U.S. and Canadian Institutions Listed by Fiscal Year 2010 Endowment Market Value and Percentage Change* in Endowment Market Value from FY 2009 to FY 2010

Before reviewing the data on the following pages, please note:

The percentage change values listed for the participating institutions DO NOT represent the rate of return for the institution's investments. Rather, the percentage change in the market value of an endowment from FY 2009 to FY 2010 reflects the net impact of:

- 1) withdrawals to fund institutional operations and capital expenses;
- 2) the payment of endowment management and investment fees;
- 3) additions from donor gifts and other contributions; and
- 4) investment gains or losses.

The market values also include the estimated valuations of real estate and other "illiquid" assets, which may have large increases or decreases in value during a relatively short period of time. In addition, transfers to the endowment from other institutional budget accounts may account for the differences in growth in endowment assets.

These factors suggest that any large increases or decreases in endowments over the past year may be exaggerated. As such, large percentage changes should be interpreted very cautiously.
