

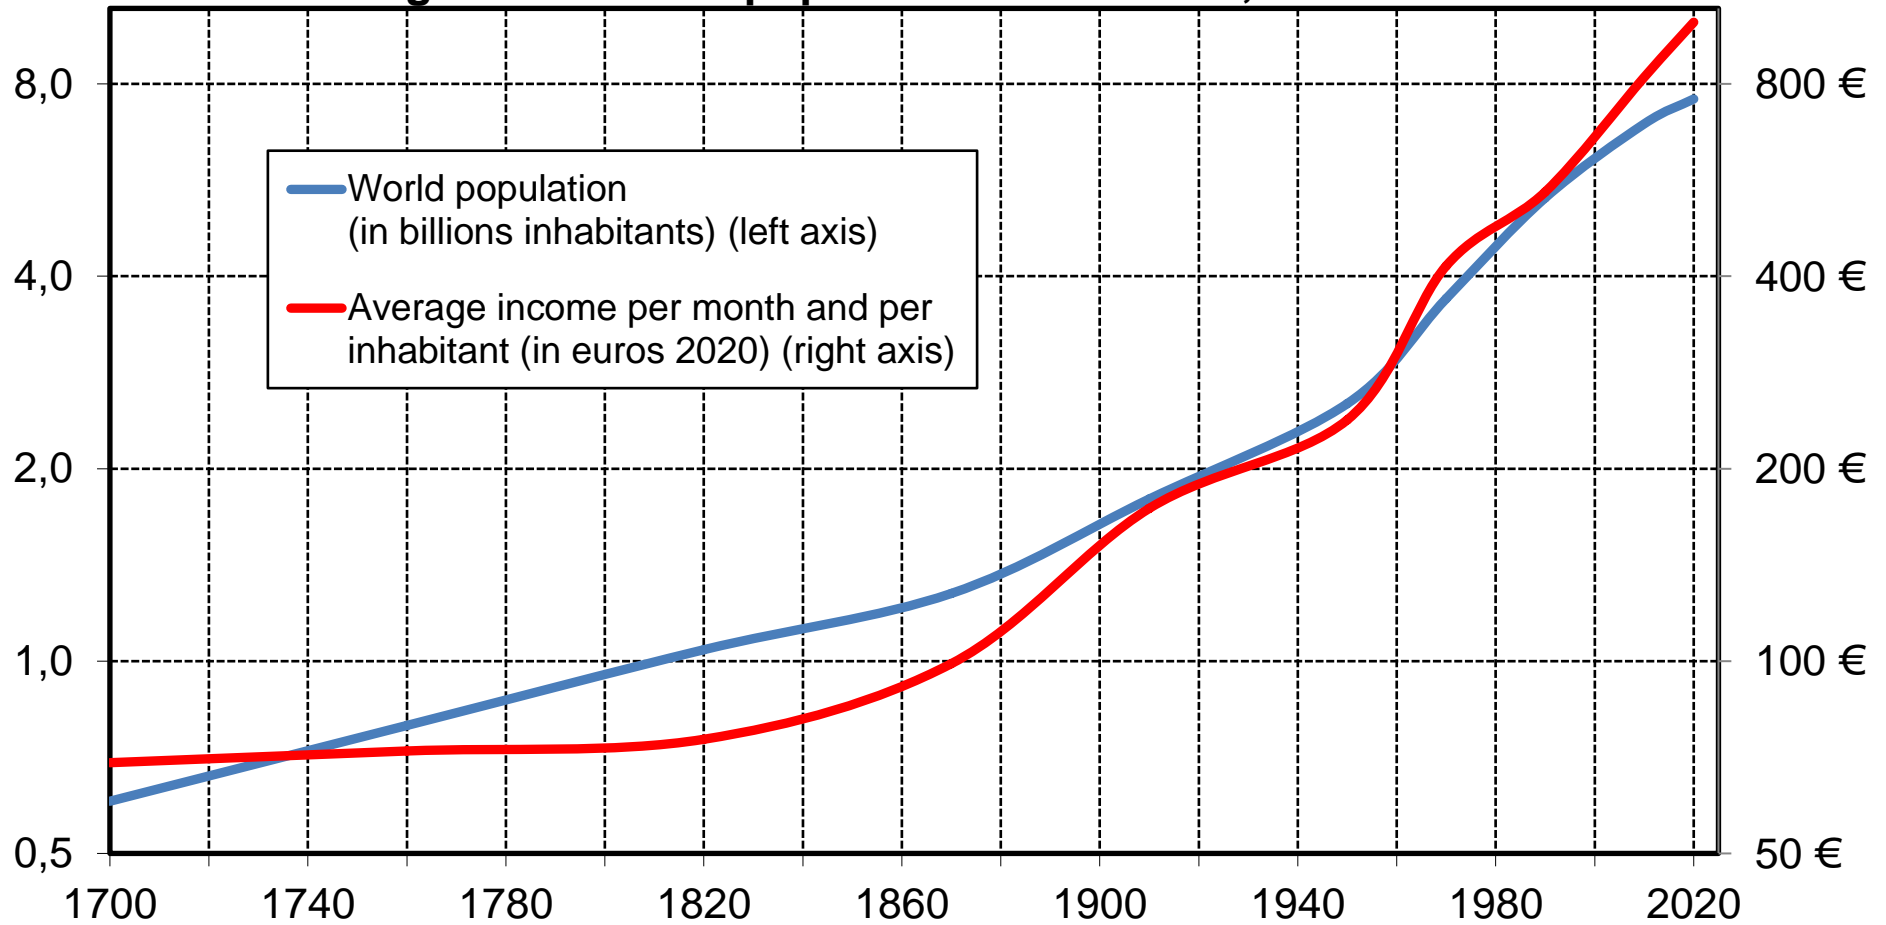

Figure 0.2. World population and income, 1700-2020

Interpretation. World population and average national income increased more than tenfold between 1700 and 2020: population increased from about 600 million inhabitants in 1700 to over 7 billion in 2020; income, expressed in 2020 euros and in purchasing power parity, increased from barely 80€ per month per person in 1700 to 1000€ per month per person in 2020.
