

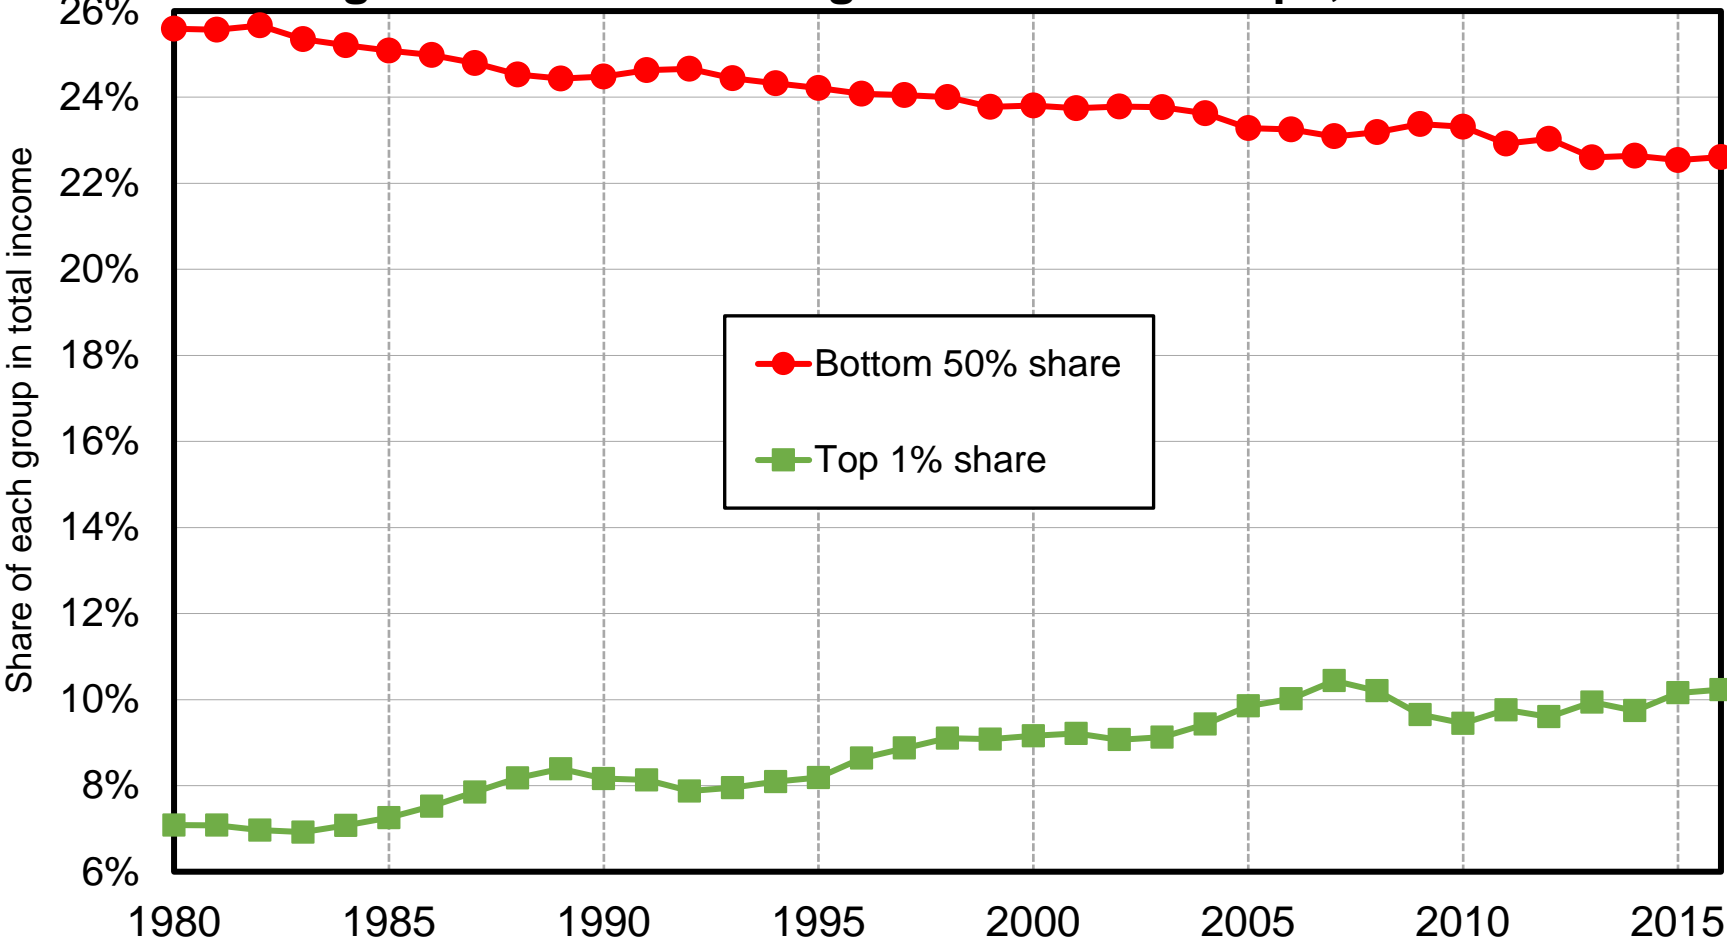

Figure 11.6. Low and high incomes in Europe, 1980-2016

Interpretation. The share of the bottom 50% lowest incomes in Europe dropped from about 26% of total income in the early 1980s to 23% in the 2010s. Over the same period, the share going to the top 1% highest incomes rose from 7% of total income to 10%. Sources and series: see piketty.pse.ens.fr/ideology.
